

The Haven

Masters Level Practicum Information

The Haven is a non-profit substance abuse treatment program for women and their children located in central Tucson. We have a Residential Program and an Intensive Outpatient Program as well as Aftercare Services. The Haven supports master's level students in their final year of study with practicum placements at both of our program levels. Due to the nature of our client needs and administrative resources, we only have a few openings for interns at any given time. Priority is given to applicants with an interest in pursuing substance abuse treatment careers and to students who are looking for practicum placements lasting at least 6 months.

If you are interested in discussing placement with our organization, please provide the information requested below, and email this form along with your resume and any other supporting documents you would like to include to KristinLindberg@thehaventucson.org.
